# Lukáš Homola

Junior Dev

I'm passionate about technology and develop web applications using HTML, CSS, JavaScript, React, MySQL, and Node.js on Ubuntu. I enjoy learning new things and constantly improving – both professionally and personally.

## Work Experience

### Anovis CZ

June 2023 - March 2025

- Provided support as a network support, service desk, and remote engineer.
- Optimized network infrastructure through regular maintenance, updates, and issue resolution.
- Managed and coordinated incident handling and escalation processes.
- Used RDP to access and operate internal company systems remotely.

### Part-time KFC & Albert

October 2019 - June 2023

- Experienced in customer service and handling financial transactions.
- I consistently provide high-quality service with a professional and customer-focused approach.

## Education

### SŠEE Sokolnice (Graduation certificate)

September 2019 - May 2023

- I graduated from high school with a focus on electronics and information technology, specializing in programming and networking.
- My studies included both practical and theoretical foundations in software development, network management, and hardware.
- I earned a high school diploma, which provided me with a solid technical knowledge base and skill set in the IT field.

May 2022 - June 2022

- During the internship, I developed skills in programming, computer networks, and electrical engineering.
- I gained hands-on experience applying theoretical knowledge and enhanced my abilities across various technological fields.
